

1 **Abstract of the Disclosure**

2 This patent teaches a machine for measuring angles over multiple simultaneous
3 axes and calculating the compounded angle using tilt sensors and/ or accelerometers,
4 and including provision for establishing a baseline or zero point for each axis plus a
5 micro-processor that receives inputs from the tilt sensors, converts them into
6 measurements of angles, may calculate the compound angle(s) thereof, displays the
7 results and, on demand, records the results in memory.
